

*1.Science is part of every moment we live.*

*2.It powers our homes with electricity, connects us through phones and the internet, and helps us travel quickly.*

*3. If its medicine, it saves lives with vaccines and treatments. Farmers grow more food using scientific methods, and entertainment thrives through TV and music.*

*4. Science makes life easier, healthier, and more connected.*

*5. Used wisely, it is a powerful tool for human progress and the planet's well-being.*
